SLR CUSTOM ALUMINUM

"A super-efficient ride that just wants to go fast."

Alpha SLR aluminum delivers a road frame that's equally good at criteriums and centuries.

>> Our Alpha SLR process features the finest bike-grade aluminum in seamless drawn, double-butted tubes. Carefully shaping and minimizing the tube walls creates a frame that's stiff and strong in high-stress areas, superlight and thin everywhere else, and long on comfort. Hand welded in Waterloo, Wisconsin.

>> The new, oversized ICON Air Rail OD 1-1/8" carbon fork reduces weight, increases handling, and adds strength up front.

>> The Pro Race Geometry is the same used by Lance Armstrong and the USPS pro cycling team.

>> Lance and the USPS team arrive in Paris

WSD
WOMEN'S SPECIFIC DESIGN

WSD women's SPECIFIC DESIGN

"The frame's a perfect fit for smaller women like myself."

>> Nikola with her dog Roadie: Canmore, Alberta

Women's Specific Design has what a man's frame doesn't - a ride made for women cyclists.

>> Our specially modified frame design provides a more comfortable fit, with improved handling and shock absorption.

>> Smaller wheels turn quicker for easier sprints and climbs.

>> Specially selected components enhance the frame - narrower bars and shorter brake lever reach make the bike easier to control with smaller hands. Shorter cranks help shorter legs get to top speed, faster. There's even a WSD saddle to improve comfort and endurance.

PERFORMANCE >> PRO **COMP** REC

2200 WSD™

A high performance bike custom fit for women.

FRAME > Alpha™ SL aluminum in a custom WSD Geometry.

FORK > ICON Classic carbon. Light, responsive, and silences road vibration for comfortable, all-day riding.

"I love riding it to coffee shops and national championships."

>> Matt Kelly, 2000 Junior National Cyclocross Champion

The Trek cyclocross frame takes the heat, whether racing or battling rush hour traffic.

>> Our Alpha SL process uses seamless drawn, double-butted aluminum tubes to make a frame that's not only strong and durable, but superlight for speed and quick handling. All essential on a cyclocross course.

>> The higher bottom bracket gets you over obstacles. Longer chainstays add mud clearance and comfort over terrain, as well as float for larger tires.

>> Our Pro Cyclocross Geometry gets you in position to accelerate and maneuver on dirt or city streets.

CYCLOCROSS >> **PRO** COMP REC

XO 1™

Taking 1999 Junior Nat'l Champ Matt Kelly and the Trek/VW team to the podium.

FRAME > Alpha™ SL aluminum in a Pro Cross Geometry.

FORK > Oversized, OD, Cross-specific aluminum that's light and ready to race. Fits tires up to 40c.

WHEELS > Aurora rims and Bontrager Jones CX tires are ready for dirt or asphalt.

OCLV CARBON HC

"It's unbelievable. The lightest, fastest bike I've ridden."

>> Ruthie Matthes, Three-time NORBA National Champion and '00 U.S. Olympic Team Member

Proven OCLV carbon and frame-stiffening Nomex® honeycomb create our lightest, fastest, most responsive hardtail.

>> Our OCLV HC carbon frame uses Nomex® honeycomb at the head lug for a stiffer front end so we can cut the overall frame weight to 3.0 lb. And carbon's vibration-soaking properties leave you something at the end.

>> We're even more race-ready, with a new bottom bracket interface that's millable from 73mm to 68mm, and a seat tube you can run a high-clamp front derailleur on. Enjoy the same Q-factor as your road bike, or run a 2x9.

>> Our Pro Race Geometry climbs, descends and corners like nothing you've ridden before.

XC HARDTAIL >> PRO COMP REC

KIDS 20" WHEELS

Mt. Lion 30

Shed the training wheels – it's go time.

FRAME > All-high-tensile Y design. A smaller version of a true BMX bike.

WHEELS > Alloy rims and Trek Paw design tires are traction-filled.

COMPONENTS > Pads, a coaster brake and a kid-sized hand brake help kids gain confidence.

COLORS > Ice Royal Blue (boys), Silver/Gloss Black (boys), Purple (girls), Pink/Sky Blue (girls)

KIDS 16" WHEELS

Mt. Cub 16

For little riders with big aspirations.

FRAME > All-high-tensile Y design. Kid-proof and fun to ride.

WHEELS > Steel rims and Trek Paw design tires are traction-filled.

COMPONENTS > Pads, training wheels and a kid-sized hand brake help kids gain confidence, safely.

COLORS > Ice Royal Blue (boys), Ice Red (boys), Pretty Pink (girls), Pure Purple (girls)

KIDS 12" WHEELS

Mt. Cub 12

It all starts here.

FRAME > All-high-tensile Y design. Kid-proof and fun to ride.

WHEELS > Steel rims and Trek Paw design tires are traction-filled.

COMPONENTS > Pads, fenders and training wheels help kids gain confidence, safely.

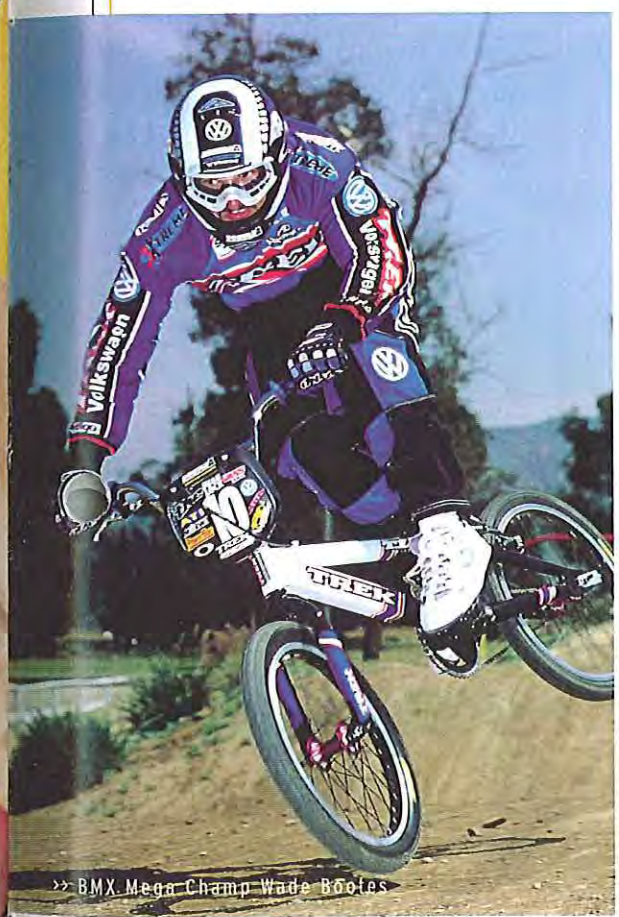
COLORS > Gloss Black (boys), Pretty Pink (girls)

BMX >>

> RACE
Designed to go fast around moto-tracks and keep cool in the heat of competition.

> DIRT
The birthplace of BMX - built for trying tricks out in backyards or on back forties.

> FREESTYLE
Designed for doing can-cans, 540s and more on any trick-supported landmark that inspires you.



>> BMX Mega Champ Wade Bootes

BMX >> FREESTYLE/AIR

VERT 1

Where vert begins.

FRAME > All-steel. Trek Air geometry blends the best of vert and street bikes.

FORK > All-steel Freestyle with1-3/8" blades.

COMPONENTS > U-brakes. Front and rear steel pegs cut the sickest tricks.

COLORS > Blue Moon, Gloss Black

BMX >> DIRT

TR10

Dirt cheap.

FRAME > New dirt design in all steel.

FORK > Oversized, Dirt-friendly and all steel. 1-3/8" blades and super-thick steer tube for easy re-entry.

COMPONENTS > 180mm forged steel crank takes the torque.

COLORS > Silver/Team Blue, White/Trek Red, Gloss Black

BMX >> RACE

T.I. 24 Cruiser

Cool in cruise control.

FRAME > New aluminum race. Pro XL size and cruiser configuration.

FORK > All Cro-Moly Trek Race, with 1-3/8" blades.

COMPONENTS > Lee Chi/ProMax linear rear brake. Maxxis tires for sure grip.

COLORS > Team Blue/ Gloss Black

BMX >> RACE

T.I. 1

Ride the same style frame raced by BMX icon Wade Bootes.

FRAME > New aluminum race in a Pro size.

FORK > Trek Race, with 1-3/8" Cro-Moly blades.

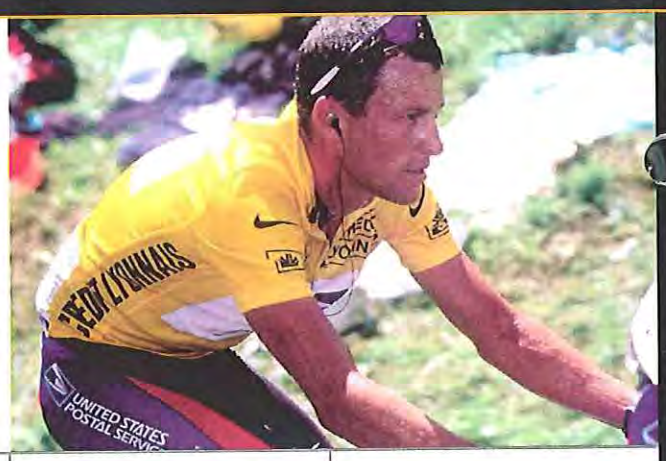
COMPONENTS > Trek race bars. Maxxis tires for sure grip.

COLORS > Silver/Trek Red, Team Blue/Gloss Black

>> OCLV™ Carbon Fiber

Our proprietary process creates the lightest, stiffest, strongest bike you can ride all day. Stock bikes with two Tour de France wins and a NORBA national championship.

Optimum Compaction is a precise carbon-to-epoxy ratio, compressed to a thickness that gives our OCLV sheets the ideal balance of light weight and stiffness. Low Void is the removal of air pockets during compression for added strength and durability. Because carbon fiber's the only directional frame material, our engineers can lay up the OCLV sheets to make tubes that soak up road or trail vibration for more comfort, or stay stiff for better power transfer. The payoff's a handcrafted bike frame that's stiff and compliant in the right places. Stronger than steel, lighter than titanium, and backed by the Trek Limited Lifetime Warranty.



> What's in it for you

OCLV 110

By optimizing the carbon content, we've created the lightest, stiffest, and strongest stock frame ever made.

OCLV CARBON 110

OCLV 120

You get the same great all-around ride the USPS team loves - in a frame that's 100 grams lighter than '99's Tour winner.

OCLV CARBON 120

OCLV

The right mix of stiffness and responsiveness to tackle the longest, toughest, and most technical pro courses.

OCLV CARBON

OCLV HC

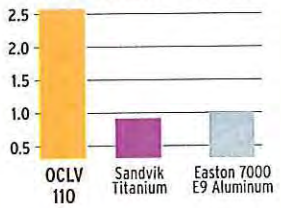
The same performance as Travis Brown's '99 NORBA winner and Lance Armstrong's 2000 Tour time trial bike.

OCLV CARBON HC

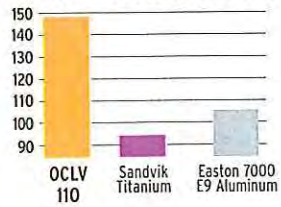
> The details

A superior material, specially engineered for Lance Armstrong. It's 160 grams lighter than '99's Tour winner, but stronger and stiffer. It uses 110 grams of carbon fiber per square meter of OCLV material, hand built into a lightweight frame.

RELATIVE ULTIMATE STRENGTH

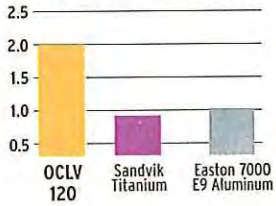


RELATIVE MODULUS (STIFFNESS)

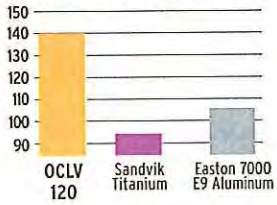


We've refined the OCLV process to give you a stiff, strong frame that weighs 100 grams less than last year's. It uses 120 grams of carbon fiber per square meter of OCLV material, hand built into a lightweight frame.

RELATIVE ULTIMATE STRENGTH

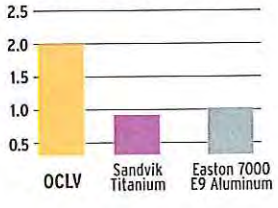


RELATIVE MODULUS (STIFFNESS)

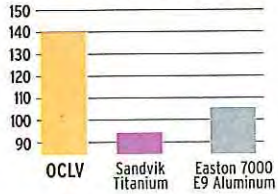


The material that started it all, featured in both Lance's '99 Tour-winner and the Trek/VW team's 2000 ride. It uses 150 grams of carbon fiber per square meter of OCLV material, hand built into a lightweight frame.

RELATIVE ULTIMATE STRENGTH

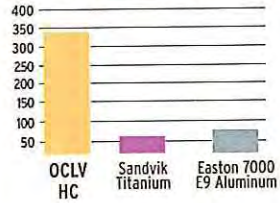


RELATIVE MODULUS (STIFFNESS)



It features a Honeycomb of Nomex® between layers of OCLV carbon in critical areas. The larger surface areas add stiffness, so we can lighten the overall frame, and create a more aerodynamic shape.

RELATIVE STRENGTH-TO-WEIGHT RATIO



RELATIVE STIFFNESS-TO-WEIGHT RATIO

>> Alpha™ Aluminum

Trek Alpha aluminum has revolutionized aluminum at all levels of performance, from racing to recreational comfort.

The Alpha process starts with the highest quality, bike-grade aluminum available. We then carefully form tubes that are thicker and stronger where they should be, and thinner and lighter where they can be. The tubes are then engineered and handbuilt into frames by the world's finest craftsmen. Many of the bikes are hand-welded in Waterloo, Wisconsin.

	Alpha SLR	Alpha SL	Alpha ZX	Alpha
> What's in it for you	Our lightest aluminum, made for race-worthy performance.	A frame that likes to go fast, but isn't afraid to carry a load.	A durable aluminum frame with a superior strength-to-weight ratio.	A frame that's light on weight and long on comfort.
> The details	We take Alpha aluminum and create seamless drawn, double butted tubing in a race design. The frame features a custom butted headtube, 3-D forged wishbone monostay, stiff and powerful elliptical chainstays, and a replaceable derailleur hanger.	We take Alpha aluminum and create seamless drawn, double butted tubing. The frame features a custom butted headtube, 3-D forged wishbone monostay, stiff and powerful elliptical chain-stays, and a replaceable derailleur hanger.	We take Alpha aluminum and create seamless drawn tubes. The frame features a custom butted headtube, wishbone monostay, stiff and powerful elliptical chainstays, and a replaceable derailleur hanger.	We take Alpha aluminum and create lightweight, TIG-welded, oversized aero power tubes. The Alpha mountain bikes feature a wishbone monostay.

	FRAME	OCLV HC Carbon. Proven by USPS in the Tour de France. The world's lightest, strongest frame material. Optimum Compaction Low Void carbon. Addition of stiff Honeycomb Nomex® between carbon skins. Tri frame based on race proven, wind tunnel-tested tech. Aero downtube, steeper seattube and flared chainstays for a comfortable, power-generating, aerodynamic position. Handmade in USA. 3.36 lb.	OCLV 110 Carbon. Proven by the USPS team in the Tour de France. The lightest, fastest production frame ever made. The world's lightest, strongest frame material. Optimum Compaction Low Void carbon. 110 grams of carbon fiber per square meter of OCLV material creates an ultralight frame. Trek Pro Race geometry. Handmade in USA. 2.27 lb.	OCLV 120 Carbon. Proven by the USPS team in the Tour de France. 100 grams lighter than the 1999 Tour winner. The world's lightest, strongest frame material. Optimum Compaction Low Void carbon. 120 grams of carbon fiber per square meter of OCLV material creates a superlight frame. Trek Pro Race geometry. Handmade in USA. 2.4 lb.	OCLV 120 Carbon. Proven by the USPS team in the Tour de France. 100 grams lighter than the 1999 Tour winner. The world's lightest, strongest frame material. Optimum Compaction Low Void carbon. 120 grams of carbon fiber per square meter of OCLV material creates a superlight frame. Trek Pro Race geometry. Handmade in USA. 2.4 lb.	Alpha SLR Aluminum. Super Light Race. Double-butted, seamless drawn tubing. Custom butted head tube. 3-D forged wishbone monostay. Stiff powerful elliptical chainstays. Cold forged replaceable derailleur hanger. Trek Pro Race geometry. Handmade in the USA. 2.8 lb.	Alpha SLR Aluminum. Super Light Race. Double-butted, seamless drawn tubing. Custom butted head tube. 3-D forged wishbone monostay. Rolf Wheels.

Rolf Dietrich created Paired Spoke Technology™ to make road and off road wheels that are stiffer, lighter, stronger. And proven to help you perform better under all conditions. Whether you love to win, or simply love to ride. Check out WWW.ROLFWHEELS.COM.

Wheels: Good wheels are essential - only the frame has a bigger impact on how your bike rides and performs.

Rolf® Vector Pro Wheelset (Road)

- Weight, 700c clincher: 760g front, 930g rear.
- Wind tunnel tested to be among the fastest wire spoked wheels available, with equal the performance of the fastest composite wheels.
- Patented KAZ Reinforced Weld Technology rims with precision-machined sidewalls for a seamless braking surface.
- Swiss-made hubset with oversized alloy axles and patented Torque Transfer rear wheel design for equal torque transmission and longer spoke life.
- Ti skewers included.

Rolf® Urraco Disc Wheelset (Off Road)

- Weight: 740g front, 960g rear.
- Patented Torque Transfer rear wheel design for equal torque transmission and longer spoke life.
- Swiss made hubset with cartridge bearings. Fully user serviceable.
- Rotor spacing set to International standard.
- KAZ Reinforced Weld Technology rims for additional strength.
- 24 spoke front and rear, 14/15 SS spokes and alloy nipples.
- Skewers included.

Rolf® Sestriere Wheelset (Road)

- Weight: 650g front, 840g rear.
- 100g lighter than any wheel in its class.
- Superlight weight, amazing stiffness and wind-splitting aerodynamics.
- Proven performer in 2000 Tour de France.
- 23mm semi-aero rims with welded machined sidewalls.
- Triple sealed cartridge-bearing hubs with oversized aluminum axels.
- Stainless steel spokes with locking alloy external nipples.
