

AWAITING TRIAL

DYNA-TECH

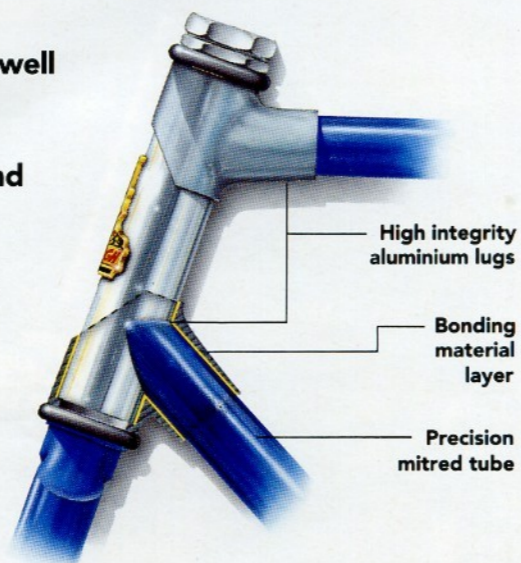

The expert witnesses have had their say, and it's all favourable. Our own Team Raleigh – who will badmouth inefficiencies with the best of them – have given them the thumbs up. The biking journalists who have hit the saddle were unstinting in their praise. Now it's your turn!

But first, look at the evidence.

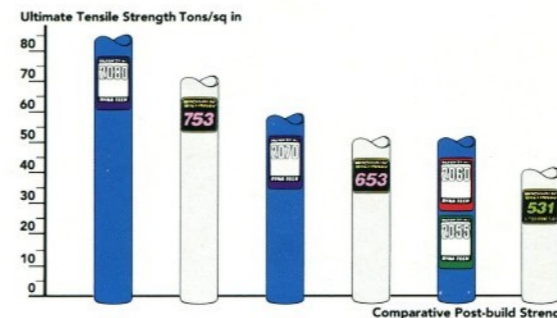

At the heart of every Raleigh Dyna-Tech MTB is a high grade Chrome Molybdenum and Manganese Molybdenum tubular frame. We use Cro Mo/

Mang Mo because of its superb and well documented strength-to-weight ratio and responsive feel. It is not prone to fatigue failure like aluminium tubing. Nor does it have the catastrophic failure mode of

some resin fibre composites. We avoid brazing or welding as this reduces the metal's strength by up to 20% at the frame's most critical point - the joints.

DYNA-TECH

Instead, we prefer to use an aerospace bonding technique which at least doubles the life of the

frame. Then, one man hand assembles each bike and even slips a photograph of himself into the box with his labour of love.

Our prime exhibit is on trial at participating Raleigh Dyna-Tech dealers for you to give a rigorous cross examination. You'll be most gratified to notice

straight away that you're a better cyclist than you thought. More of your energy finds its way to the

wheels, instead of being soaked up by the frame's innate flexibility.

All we ask is that you give one of our MTBs a fair trial.

We know what the verdict will be.

TRADE IN... TRADE UP
You will save up to £200 when you trade-in your old bike for a new Dyna-Tech MTB or road bike. Ask your participating dealer for full details of the special trade-in prices now available.
Offer ends 31st October 1991

Where we're awaiting trial

There's a Dyna-Tech MTB at each of these appointed dealers, waiting to be put through its paces. The trial is free, but take along proof of identity with a suitable credit card. We hope you're serious about MTB's. Because we'll soon find out, won't we?
