**1. Select size**

Airborne Lucky Strike 3AL / 2.5V Titanium MTB Frame, 14" (Disc Brake Compatible)

**2. Type in the quantity**

**3.**

After a successful season on the NORBA and UCI cross-country MTB circuit (big thanks to Ann Trombley and the kiwis), including Airborne Flying Ace John Stamstad's colossal off-road endeavors in Alaska and the 2,495-mile Continental Divide trail, we took the existing Lucky Strike® titanium hard tail design and scrutinized every inch of the frame. The new and re-engineered Airborne Lucky Strike® DB (disk brake) was designed to accommodate certain

riders' needs (top tube and down tube stiffness, longer travel suspension forks), while acknowledging technology (rear disk brakes). The goal was to offer more versatility, without sacrificing performance. We hope you like it.

Upgrades from the original Lucky Strike: externally machined and chamfered head tube; tear-drop top tube; horizontally ovalized down tube; new dropouts; re-engineered non-drive-side seat stay for disk brake mount.

Available manufacturer-direct through Airborne, no middlemen, no sales commissions, no retail markup, just the best product sold wholesale at an unbeatable price.

## Armament

- Certified Aerospace Grade 3AL/2.5V titanium alloy (3% Aluminum, 2.5% Vanadium, 94.5% titanium)
- Custom drawn, seamless, 100% cold worked tubing
- Non-drive side rear disk brake mount
- Suspension specific geometry
- Tear-drop shaped top tube
- Horizontally ovalized down tube
- Inverted titanium slotted cable guides
- Two sets of water bottle bosses D/T & S/T
- Titanium seat stay chain hanger
- CNC machined 68mm English threaded bottom bracket shell
- CNC machined head tube fits standard 1 1/8 head set
- Front derailleur: 31.8mm clamp size, top pull
- Accepts 27.2mm seat post
- Lifetime warranty

Frame Finish: Hand polished is the standard finish on high-end titanium frames. We've taken it one step further by adding a subtle but effective brushed process to enhance tube strength and add a unique, bold finish.
