# HELMETS & COVERS

Safety First. We didn't forget this adage when designing our helmets. All Trek Helmets exceed both the Snell Impact Test and the ANSI 290.4 Bicycle Helmet Performance Standards.

But being avid cyclists, we know a bicycle helmet must do more. First, the helmet must be cool and comfortable. We designed our helmets with multiple, large vents with air flow channels to keep the wearer cool under the warmest conditions.

Second, the helmet must fit properly. Our uniquely shaped helmets are made in two to three shell sizes to fit the largest number of consumers. Also, we include a set of sizing pads with each helmet to insure a proper fit.

TREK LITE™ HELMET	COLOR	SIZE			
Resized for 1991, the Lite comes in three new sizes, with the smallest made to fit children.		XS	S	M	L
