Escape Routes

99

*"The clearest way into the Universe
is through a forest wilderness."*

JOHN MUIR 1838-1914

Our home. Where the green canopy and the forest floor remind us that a thousand years is not such a long time. Where there's an escape from all the little things that seem like such big things back in that other world of jobs, bills and being a grown-up. Perhaps it's impossible to ever truly know this place. Like all of us, it's always changing, growing, slipping towards eternity. Like our bikes, nothing is wasted and every part has its place and function. Our home. We can't bring it to you, but our bikes can take you there.

the inspiration to make great bikes

Constant refinement remains our motto.

Paul Brodie's fertile mind keeps coming up with ways to advance mountain bike design.

Bruce Spicer and some of Canada's best elite riders abuse and evaluate each innovation

with hard core riding on Vancouver's

infamous North Shore. The methods and

technologies we've developed for our

hand-built bikes filters through to

every Brodie. Our prototype bikes, such

as our downhiller with eight inches of rear

travel and the Nexus drivetrain, are testing

platforms for innovations and refinements

designed to maximize speed, reliability and control.

We adapt motocross technology, take racer feedback and improve our designs every year.

It's the way we achieve bike-building perfection. And it

continues in '99 with an expanded line-up of Brodies to suit every rider. Those who live out near the edge of the envelope will be craving our latest dual suspension offerings. Our single-pivot design delivers rear travel up to 4.5 inches, Brodie dual suspension bikes carve their way through high speed hits or technical drops.

He's built over 4000 in his lifetime.
Because Paul Brodie likes bikes.
A lot. Maybe too much if the grease
on his pyjamas is any kind of clue.
OK, we're kidding.
Paul doesn't wear pyjamas.

Others will appreciate the creative parts mixes we've put together to maximize value throughout our line-up. Every

bike has been spec'ed with a specific riding style in mind. Smaller

riders will be

digging our

12" frame

size, taller ones will drool over a chance to get aboard a 22"

Brodie. We've continued

our work with aluminum with

new custom-drawn Airfoil tubes

and Easton's Rad tubing.

See Spot. Spot is a one-speed custom hub. Spot is strong and light. See Spot transfer riders' effort into forward motion with simplicity and efficiency. Good Spot.

1999 sees the return of brodie's Gatorblade, a classic bomb-proof rigid fork. Also back this year is the Romax. All those mountain bikers who never thought they'd buy a road bike may have to eat their words! There's even a single-speed and a tandem to choose from in this year's line-up.

And just like last year and every year that a bike has borne the Brodie name, we've, made sure that the Brodie reputation for quality, performance and value is as rock solid as our bikes.

1999

OUR BIKES

Force

This rugged bike re-defines entry level. With a full cro-moly frame and proven geometry that sizes right down to 12". Smaller riders can start mountain biking the best way possible, aboard a Brodie

Brodie Custom Selected Tange Double/Quad Butted Cr-Mo Frame.

New oversize "S" bend stays for extra clearance & super stiff braking performance

Brodie 25° rise TIG welded stem & aluminum bar

Wheelset: Sun Rims, Stainless Spokes & Dyna-Mo on/off road tires

New Shimano Revo-Shifting with Shimano derailleurs

New Clipless upgradeable pedal

Quantum

Available for '99 in a 22" frame size, the Quantum remains one of our best sellers. Comfort features such as Brodie O-Zone saddle and gel grips with performance parts like an eight speed rear hub and Tektro "V" brakes make the Quantum a great combination of quality and value.

Brodie Custom Selected Tange Double/Quad Butted Cr-Mo Frame.

Shimano QR Alivio Hubs, 8 spd, Sun Rims,
Stainless Spokes, Dyna-Grip F&R tires

Brodie O-Zone Saddle & Brodie Gel grips

Shimano Rapidfire Plus Shifters with STX rear derailleur

New Brodie Gatorblade Fork

Tektro "V" brake with linear spring tension

Energy

The Energy sports Wellgo's new SPD upgradeable pedals, the crisp shifting of an eight-speed XT rear derailleur, and Dyna-Slick semi-slick tires. Combined with Dia-Compe "V" brakes the Energy stops as fast as it goes.

Brodie Custom Selected Tange Double/Quad Butted Cr-Mo Frame
8 Spd Shimano Rapidfire Plus Shifters with XT rear derailleur
Shimano STX-RC hubs, Ritchey Rims, Stainless Spokes & Dyna-Slick Tires
SR Suntour Alloy Crankset with interchangeable rings
Dia-Compe #733 "V" brakes with linear spring tension & Dia-Compe Brake Levers
Dia-Compe Aheadset, Brodie 25" rise TiG welded stem & aluminum bar

Torque

Just as fast, light and agile as ever, our premier rigid bike now offers the flexibility of 9 speed gearing. LX/XT parts, including Shimano's new LX parallel push braking system make the Torque low on maintenance and big on enjoyment.

Brodie Custom Selected Tange Double/Quad Butted Cr-Mo Frame

New "9" Spd Shimano LX Rapidfire Plus Shifters with XT rear derailleur

New SR Suntour "9" spd crankset, low profile

Chain design, interchangeable rings

New Shimano LX parallel push braking technology

Wheelset: Ritchey rims, Stainless Spokes, Dyna-Slick Tires

Brodie 10° rise TIG welded stem, aluminum bar

Serfas Grip & Dia-Compe Aheadset

Alpha

Brodie's Alpha has great pricing, beefy Suntour MG80 front suspension, proven Brodie frame and an intelligent parts package. Real off-road performance and you'll have money left over to rehydrate with a frosty beverage.

Brodie Custom Selected Tange Double/Quad Butted Cr-Mo Frame.

SR Suntour MG 80 Suspension, 63mm travel,
Magnesium Legs, Adjuster w/ display

New Shimano Revo-Shifting with Shimano Derailleurs

New Brodie "O" Zone Saddle & Brodie Gel Grips

New SPD upgradeable pedals

Wheelset: Ritchey Rims, Stainless Spokes, Dyna-Grip Front & Rear specific tires

Brodie 30 Calibre Riser Bar

A silver mountain bike is leaning against a wall made of stacked, worn tires. The bike has a silver frame with 'omega' and 'brodie' written on it. It has black tires, a black seat, and a black handlebar. The background is a wall of many stacked, old, and worn tires, creating a textured, circular pattern. The lighting is dramatic, with strong shadows.

Omega

A quad-butt frame and 24 speed drivetrain team up to deliver a well-rounded off-road package. The Omega has been thrashed hard by our test riders to make sure it can handle the toughest terrain and come back for more.

Brodie Custom Selected Tange Double/Quad Butted Cr-Mo Frame.

SR Suntour MG 90 Suspension, 75mm travel,
Magnesium Legs, Adjuster /w display

Shimano Alivio 8 Spd QR Hubs, Sun Rims,
Stainless Spokes, Dyna-Grip F&R Tires

New Wellgo MTB pedal, SPD upgradeable, Toe Clip & Straps Included

New Dia-Compe #733 "V" brakes with
Linear Springs & Dia-Compe Levers

Shimano Rapidfire Plus Shifters with STX rear derailleur.

Infinity

When you're ready to rip it up, the Infinity takes away your limits. The new RockShox Hydra Coil front suspension, full LX 9-speed shifting, and Brodie 30 Calibre Riser handlebars will give you the freedom to create off-road art.

Brodie Custom Selected Tange Double/Quad Butted Cr-Mo Frame.

New Rock Shox Jett XC Hydra Coil Fork with 75mm of plush travel

New 9-spd Shimano LX Rapidfire shifters
with Front & Rear LX derailleurs

New SR Suntour 9 spd compatible crankset
4-arm with interchangeable rings

Wheelset: Sun Rims, Stainless Spokes, Ritchey Z-Max Tires

Serfas Dual density grips, Brodie Aluminum Bar
& Brodie TIG welded 10° Rise Stem

Kinetik

The Kinetik's way cool spec includes LX "V" brakes with parallel push, RockShox Judy XC fork and sizing up to 22". A Shimano XT rear derailleurs and nine speed rear cogset provides the perfect gearing ratio for every incline.

Brodie Custom Selected Tange Double/Quad Butted Cr-Mo Frame.

New Rock Shox Judy "XC" LT with Hydra-Coil, 80mm of plush travel disk mounts

New LX 9 spd RE+ shifters with LX Front & XT Rear Derailleurs, LX Brakes

Shimano Original SPD pedals

WTB SST Saddle & WTB Velociraptor tire Front & Rear Specific

Brodie 5" Rise TIG Welded Stem & Brodie Aluminum Bar/w Serfas Grips

Evolution

Out here on the "Wet" Coast we know about rain and braking. This year's Evolution has Hayes discs to haul it down from speed in any weather. With plush Judy XC suspension and Brodie's two inch riser bar the Evolution is a point and shoot ride.

Brodie Custom Selected Tange Prestige Double/Quad Butted Cr-Mo Frame.

New Rock Shox Judy "XC" with Hydra Coil, 80mm of plush travel, disk mounts

New LX 9 spd RF+ shifters with LX Front & Rear Derailleurs

Hayes Cable/Hydraulic Disc brakes with Hayes Mount Formula Hubs

New Shimano PD-M545 Platform SPD Pedal

Wheelset: Sun Rims, Stainless Spokes & WTB Velociraptor/Tyrannoraptor Tires

Rocket

The name says it all. Designed for maximum performance, the Rocket has a full Shimano XT nine speed gruppo, Hayes discs and Manitou suspension with TPC damping technology draped all over an unbeatable Tange Prestige, double and quad-butted frame.

Brodie Custom Selected Tange Prestige
Double/Quad Butted Cr-Mo Frame

Manitou SX-R with 80mm travel, TPC damping and micro-lube

New XT 9 spd RF+ shifters with full XT gruppo

Shimano PD-636 Platform Spd Pedals

WTB: Momentum Grease Guard Headset,
SST Saddle, Veloci/Tyrannoraptor Tires

Hayes Cable/Hydraulic Disc Brake with
Hayes original Disc Mount Hubs

Dynamo

The Dynamo boasts Brodie's new Airfoil downtube for a rock-solid ride. This feature-packed bike has all the go-fast goodies you could ask for - draped on a #7005 aluminum frame with Brodie's tried and true geometry.

Brodie Custom Selected #7005 Aluminum Frame
with Brodie Airfoil Downtube

New Rock Shox Judy "C" LT with Hydra Coil, 80mm
of plush travel, disc mounts

New LX 9 spd RF+ shifters with LX Front & Rear Derailleurs

Ritchey Equipped: Clipless pedals, Saddle, Z-Max Tires, Front QR Hub

Sun Rims with Stainless Spokes

Dia-Compe #733 "V" brakes with linear springs
& Dia-Compe Brake Levers

Electro

Sure-footed in singletrack and rock-solid over extreme terrain, the Electro's long travel suspension and Hayes front disc brake make a great combination. The airfoil downtube delivers unmatched bottom bracket rigidity. Ritchey pedals and tires put every ounce of power to work.

Brodie Custom Selected #7005 Aluminum Frame with Brodie Airfoil Downtube

New Rock Shox Judy "C" LT with Hydra Coil, 80mm of plush travel, disc mounts

Hayes Cable/Hydraulic Disc Brake with Avid rear "V" brake & Avid Brake Levers

Ritchey Logic Clipless Pedals & Ritchey Z-Max Tires

SR Suntour 5-arm Crankset with fully interchangeable rings.

Shimano Rapidfire shifters with LX rear derailleur

Voltage

Hard-core riders need no-nonsense bikes. That's why we spec'd the Voltage with a complete LX gruppo and an XT rear-derailleur upgrade. It's the perfect example of Brodie thinking: build bikes that beg to be ridden hard.

Brodie Custom Selected #7005 Aluminum Frame with Brodie Airfoil Downtube
New Rock Shox Judy "XC" LT with Hydra Coil, 80mm of plush travel, disc mounts
Complete Shimano LX 9 spd Gruppo with XT Rear upgrade & Shimano Spd's
Wheelset: Mavic Rims, Stainless Spokes & Shimano LX Hubs
Shimano LX Parallel Push Brakes, AVID 1.9 Brake Levers with Speed Dial
New Brodie TIG welded 5° Stem & Ritchey Force-Lite Bar with Serfas Grips

Spark

The podium's gonna feel just like home when you race with the Spark. This is what race-ready really means. Easton Ultralite, full XT with XTR rear derailleur, a cross-country dream that's good to go, straight outta the box.

Brodie Custom Select, Easton Ultralite Aluminum Frame

Rock Shox Judy "SL" LT 80mm of Plush Travel, alloy steertube

Full Shimano XT Gruppo with XTR rear Derailleur upgrade

Wheelset: Mavic#22" Rims, Stainless Spoke & Alloy Nipples, Racing Raptor Tires

Shimano M-515 SPD Clipless Pedals

New Brodie TIG welded 3" 31.8" & Ritchey Force-Lite Bar with Serfas Grips

Holeshot

With over twenty years of racing experience, it's safe to say that Bruce Spicer knows what makes a good bike. So, we gave our resident test pilot and all-around great guy a blank slate and asked for the ultimate hardtail. Here it is. It's the '99 Holeshot and it kicks ass!

Brodie Custom Select, Easton "Rad" Tube Aluminum Frame

Hayes Hydraulic Disc Brakes, Hayes Brake Levers & Hayes Hubs

Manitou X-Vert Front Shock 100mm Travel & WTB Momentum Alloy Headset

Wheelset: Sun Rhino-Lite, Stainless Spokes, Maxxis MoFo Tires

Brodie 50 Calibre Riser Bar, Brodie TIG Welded 5° Rise Stem & Serfas Grips

100% Shimano Guts XT Gruppo & Shimano 636 Platform SPD Pedals

ZigZag

Grab a ZigZag and and get high. In the mountains. Dual suspension with RockShox sucking up the big hits for you. The Brodie 30 Calibre Riser Bar delivers heads-up control so you can concentrate on the pretty colours.

Brodie Custom Select #7005 Aluminum Dual
Suspension with Airfoil Downtube

Rock Shox: Jett XC Fork with Hydra Coil,
75mm Travel & RS Coupe Deluxe Rear

Dia-Compe #733 "V" Brakes with Dia-Compe DP-7 Brake Levers

Ritchey Vantage Sport Rims & Ritchey Z-Max Tires

SR Suntour CW-XR-32 Crankset with Interchangeable Chainrings

Shimano Rapidfire Plus Shifters, LX Rear Derailleur with 8 spd technology

Diablo

For formal occasions Brodie is proud to present the Diablo. Stunningly attired in an all-black ensemble, this dual disc, long travel bad boy is a perfect accessory for outdoor parties and other events. Or, you could skip the super model soirees, and ride like hell.

Brodie Custom Select #7005 Aluminum Dual Suspension with Airfoil Downtube

Manitou Evert-E, 100mm Travel, TPC Sport Oil Damping & MicroLube

Hayes Cable/Hydraulic Disc Brakes with Avid 1.9 Brake levers with Speed Dial

Wheelset: Hayes Formula Hubs, Stainless Spokes & Sun Rhyno-Lite Rims

Super Oversize Maxxis MOFO 26X2.35 Tires

Wellgo WPD Downhill Platform Clipless Pedal

Devo

Ball burnish is not the shine your butt gets from too much time in the saddle. It's the everything exposed look of our top-of-the-line dually, the Devo. Meticulous workmanship, X-Vert double clamp front shock and full hydraulic discs – it looks so fine that paint would have been overkill.

Brodie Custom Select #7005 Aluminum Dual Suspension with Airfoil Downtube

Manitou Evert-T, 100mm Travel, TPC Sport Oil Damping & MicroLube

Rock Shox Super Deluxe Rear Shock

Hayes Full Hydraulic Disc Brake with Hayes Brake Levers

Wheelset: Hayes Hubs, Stainless Spokes, Sun Rhino-Lite Rims & MOFO Tires

New Shimano 636 Platform SPD Downhill Pedal

Unibomber

There's a couple of good places for those funky cruisers. The beach and the dumpster. For real single speed performance the Unibomber is a high-zoot, super lightweight, all-terrain example of warped minds at work. We're only making a few and then we have to get back to licking all those postage stamps.

Brodie Custom Selected #7005 Double/Triple Butted Aluminum Frame

New Brodie Gatorblade Cr-Mo Fork

Canadian Made "Spot" alloy single speed 135mm Hub.

New Wellgo BMX Pedal with SPD capability on one side.

Wheelset: Mavic 221 Rims, Stainless Spokes, Ritchey Speedmax Tires

Avid 2.0 "V" Brakes with 1.9 brake Levers with Speed Dial

Zig Zag

Grab a ZigZag and get high. In the mountains. Dual suspension with RockShox sucking up the big hits for you. The Brodie 30 Calibre Riser Bar delivers heads-up control so you can concentrate on the pretty colours.

Brodie Custom Select #7005 Aluminum Dual Suspension with Airfoil Downtube

Rock Shox: Jett XC Fork with Hydra Coil, 75mm Travel & RS Coupe Deluxe Rear

Dia-Compe #733 "V" Brakes with Dia-Compe DP-7 Brake Levers

Ritchey Vantage Sport Rims & Ritchey Z-Max Tires

SR Suntour CW-XR-32 Crankset with Interchangeable Chainrings

Shimano Rapidfire Plus Shifters, LX Rear Derailleur with 8 spd technology

Diablo

Canadian Made "Spot" alloy single speed 135mm Hub.

New Wellgo BMX Pedal with SPD capability on one side.

Wheelset: Mavic 221 Rims, Stainless Spokes, Ritchey Speedmax Tires.

Avid 2.0 "V" Brakes with 1.9 brake Levers with Speed Dial.

Romax

This blast from the past definitely ain't retro. We took a name familiar to Brodie aficionados and updated it for the next millennium. Perfect for touring, cyclo-cross, training races, whatever. We skipped the attitude and got on with the job of building a kick-ass road bike.

Brodie Custom Selected Tange Prestige Double/Triple Butted Cr-Mo Frame.

Brodie Custom designed "Rodie-gator" "D" section Cr-Mo fork

New 8 Spd RSX STI levers with 105 Rear Derailleur

New Tektro "MINI V" with RSX Brake levers

Ritchey: Logic Clipless Pedals, Vector Saddle, 32c Speedmax Tires, Rock Comp Rims

RSX Triple Crankset with 12-23T cassette and 8 spd shifting.

JoJo

It's no wonder that there's no cycling equivalent to the "Mile-High Club". All-terrain tandems are few and far between. We saw a gap and filled it with the JoJo. Go farther, faster and enjoy the feeling of teamwork with your favourite riding buddy at the same time.

Brodie Custom Selected Tandem#7005 Aluminum Frame & Tandem Cr-Mo Fork
Shimano Tandem Specific 40h QR Hubs, Sun Rhino-Lite Rims & Stainless Spokes
Shimano 9 speed technology with XT Derailleur, New XT "V" Brakes
Shimano Tandem 105 Triple Crankset with Ritchey Clipless Pedals
Brodie 5° Rise TIG Welded Stem, Brodie Riser Bar & Adjustable Stoker
Wilderness Trail Bike Racing Raptor Tires

OUR DETAILS

At Brodie, we build our bikes with the finest quality cromoly and aluminum tubes. Our roots are in creating hand-built custom frames and the benefits of that experience can be seen in the sloping top-tube design pioneered by Paul Brodie, proven geometry, and distinctive features such as S-bend stays. Every Brodie rigid frame bike is designed to accept front suspension upgrades with up to 80mm of travel.

Rocks or roots, potholes or curbs, off-road or on, the wheels of a bicycle take a lot of abuse. At Brodie Bicycles we think that wheelsets are one of the most important specs on a bike. Only top name rims like Sun Metal U.S.A., Ritchey, and Mavic grace Brodie bikes. Precision assembly, stainless steel spokes, and durable hubs ensure that Brodie wheelsets are of the finest quality.

From the Jett XC model upwards, RockShox's new Hydra Coil suspension system offers riders a supple, plush ride, low maintenance, and maximum tunability. The system is maintenance-free for up to 100 hours, offers a variety of linear spring rates, and the oil in each leg can be separately tuned. The Judy series all offer disc brake mounts and every Judy-equipped Brodie comes with the long travel (80mm) option. The top-of-the-line Judy SL features the new C3 cartridge with separate compression and rebound adjustments.

Clipless pedals deliver more power, better control, and are easy to use. Shimano offers a wealth of models such as the affordable 515, and the aggressive, platform 545 and 636. Some Brodies come equipped with Wellgo's new SPD upgradeable pedal so that new riders can make the switch to clipless efficiency at their own pace.

Our new "Airfoil" downtube is custom drawn, butted and shaped for maximum strength at the bottom bracket and headtube. With a 50mm diameter at the bottom bracket, and ovalized 59mm at the head tube. The Airfoil also features a closed box section at the headtube removing the need for gusseting yet still offering exceptional strength.

The TIG welded, anodized, double pinch Pilot stem has the same Brodie quality commitment to quality as our frames. Our riser bars, the 30 and 50 Caliber feature 6061 aluminum with a 3mm oversize wall thickness for maximum strength and safety.

Easton Ultralite and RAD tubing leads the way in light, durable, race-ready bike frames. Easton's Taperwall tubes are cold-drawn, and feature smooth, long butts to optimize shock dissipation without loss of stiffness. The all new RAD tubing has an innovative headtube flare to give a solid, filled-in box construction, maximizing headtube strength and rigidity. At Brodie, we custom select the wall tapers on our selections from Easton to ensure the legendary Brodie ride.

Our single pivot, sealed bearing system for the rear swingarm on Brodie dual suspension bikes is tried and true technology. It offers performance, reliability, and ease of maintenance. Paul Brodie's experience with frame design translates into innovative designs that focus on performance, not gimmicks.

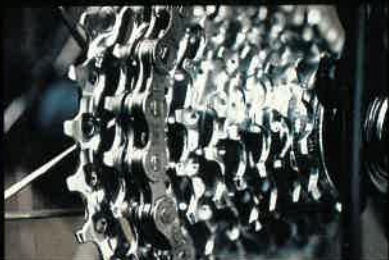

There's a lot of tires on the market. We've tested them all, and found the right skins for every Brodie. WTB, Maxxis, Ritchey, and Dynamo made the grade this year. In addition to picking the best traction and weight characteristics, check out the fast rolling semi-slicks, and super tough oversize units we've spec'd.

The advent of dual suspension has meant new challenges for bike designers. There's a whole new world of things to think about when you're designing duallies. We've made sure that Brodie dual suspension bikes are the best around by making sure the bikes not only work, but they can be adjusted for perfect fit with features like "ES" [Elevated Seat Mast] designed for extra seatpost clearance for maximum seat range adjustability.

The Gatorblade is back. This blast from our past is the bomb-proof straight blade fork that helped start the Brodie reputation for bikes with strength, precise control, and light weight. Featuring 25.4mm diameter blades, fork crown offset, and forged dropout, the Gatorblade carves turns, smoothes out the road, and looks good doing it!

Once reserved for racing and high-performance riders, nine speed shifting is now available in Shimano's LX group. Why so many gears? Because the secret to effective cycling is using your gears to maintain a steady cadence. Matched with Shimano's race-proven Rapidfire Plus shifters you can find the right gear fast.

Shimano has put a twist into shifting with their new Revoshifters. Now cyclists can choose from twist, or Rapidfire Plus trigger shifting and still stay with Shimano's proven performance. Either way, ease of use, low maintenance, and trouble-free operation is guaranteed.

Suntour's MG90 fork smoothes out the trail with 75mm of travel, machined alloy pre-load adjusters for tunability and is disc brake compatible. The forks are constructed of super-strong magnesium with an oversized forged alloy crown. The combination of MCU (micro-cellular urethane) and coil spring gives the fork great performance on small bumps and big hits.

The LX group is the workhorse of Shimano components. You can find it on bikes in a variety of price ranges. On lower-priced bikes it's because of affordability. High-end bikes sport LX because it's rugged, reliable, and has a well-earned reputation for excellent performance in all conditions. This year, LX gets even better with a nine speed rear cogset, parallel push braking, and a great looking pewter grey finish.

One test ride is all it takes to find out the difference disc braking makes. Hayes disc brakes are available this year on a variety of Brodie's in both cable and hydraulic actuated models. With consistent braking in all conditions disc brakes offer superior control and performance. After all, if they'll stop a "Hog" you know they can do the job!

Suspension innovation never stops. The big names, RockShox and Manitou, both keep offering riders advances in shock technology. Manitou's MicroLube system lets you ride for over 100 hours before tear-down and cleaning with a lube port on each stanchion leg to allow for quick slider lubrication. Not to be outdone, RockShox's oil bath system offers the same low maintenance and just like Manitou's TPC twin piston design, excellent tunability.

At Brodie, we don't skimp or overlook any part of our bikes. Tires, headset, saddles, they're all important. We use WTB (Wilderness Trail Bikes) extensively throughout our model line-up because of well thought out features like Greaseguard and sloping nose saddles. Their experience and commitment to quality is a reflection of our own approach to bike-building.

Single-speed meant more than just ripping all the cogs off a rear hub and tossing out the derailleurs. We kept the same attention to intelligent parts choices that goes into every Brodie. A custom, Canadian-made "Spot" 135mm alloy rear hub handles all the torque you can throw at it and the combination of 32T front ring and 16T rear cog was chosen after experimenting with numerous gearing combinations.

Tektro's Mini-V's are the trick solution to stopping the Romax. Combined with the new RSX eight speed STI levers, 105 rear derailleur, and RSX brake levers the spec combination is a great example of the way we make sure that every Brodie has its parts in the right place.

The power of four legs working together means that tandems are subject to a lot of stress. The JoJo is equipped with tandem specific parts like bomb-proof hubs and rims to ensure low maintenance. And to make sure that everybody takes a turn in the engine room, we put a suspension seatpost in the stoker position for maximum comfort.

OUR FRAMES

eXpresso

The eXpresso has always been a perfect mix of light weight and incredible strength. The Tange Prestige, Prestige Oversized and Prestige Ultimate Ultralight come to life on the trail and deliver the world-famous Brodie ride.

Sovereign

Paul Brodie's flagship still reigns over the entire model lineup. Flawless welds join Tange's Prestige Ultimate Ultralite and Prestige tubing for an off-road work of art. Riders who take the time to learn how they are built end up die-hard Brodie fans for life.

Catalyst

The Catalyst's heritage as a bombproof hardtail lives on. Impeccable craftsmanship by skilled artisans and Brodie's custom selection of specially butted Prestige Tange tubes insure the Brodie mystique is infused in every frame. V brake and disc mounts let you choose the kind of stoppers to slow you down

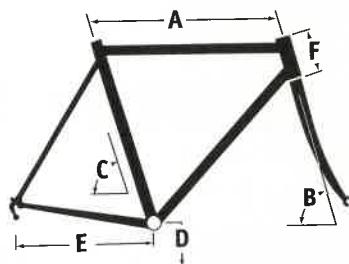

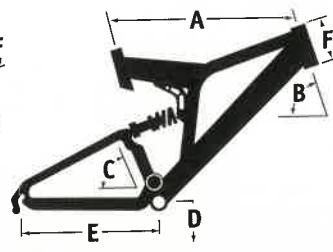

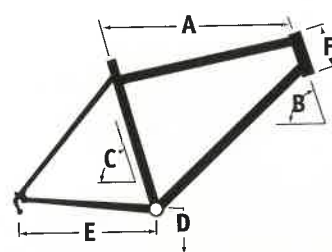

ClimbMax

Reborn in aluminum, the ClimbMax brings a new flavour to the Brodie handbuilt line-up. We combined the ideal tube thicknesses and butting with our legendary geometry to deliver the same sought-after ride characteristics in an Easton Ultralite frame with V brake and disc mounts.

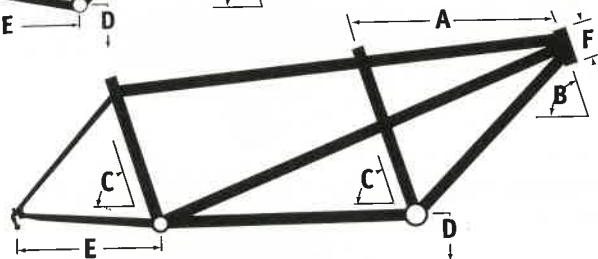

Libido

#7005 Aluminum, full bearing articulation for a smooth, reliable pivot, and our own Airfoil downtube make the Libido a confidence inspiring choice. Demanding riders will be able to conquer terrain that makes lesser mortals call it a day. The Libido can handle your passion for trick parts with V brake and disc mounts.

Bruce Spicer's MTB SURVIVAL TIPS

Bruce Spicer doesn't like to brag, so we'll do it for him. How does a Cactus Cup victory, four top ten finishes in the World Cup races, and 13 national titles sound for a record. Add hundreds of wins in local and national events and about a zillion hours on some of the world's nastiest trails and you've got a guy who's more than a little qualified to offer some advice. Here's some hot tips on choosing and riding your Brodie from our resident test pilot.

The Front Brake is Your Friend

Don't believe people who tell you to ignore the front brake because it will flip you over the bars. Use a smooth, steady squeeze on the brake lever and you will soon learn to brake hard without flipping or skidding. You'll have more control over your stopping ability, and the trails will thank you.

Where you look is where you go

When choosing a line through the terrain, look up the trail at where you want to end up, not where you don't! Following your eyes will guide you away from the obstacles. As a novice, this was the best piece of riding advice I ever had given to me.

Determine the type of riding you want to do and set a price range that you feel comfortable with

Establish some rough parameters that may influence your selection, this will assist the bike store sales staff to focus their suggestions to your needs.

Synthetics – Even Better Than The Real Thing

Cotton is a great natural fibre, but it sucks for riding in. A polypropylene jersey made of modern synthetics will do wonders for your riding comfort by wicking sweat away from your body. As you get more into riding, shoes and shorts designed for cycling will make a huge difference in performance and comfort. You'll be dryer and warmer and beat the bronchitis bug faster than I figured out how to spell it!

Ride the bike, don't let it ride you

Suspension developments are taking away the need to use "Body English" more and more. But, to really ride a bike well, you still need to 'help' it over even the smallest obstacles as well as into dips and holes in the trail. Your hands control the front wheel, your feet control the rear.

Boy Scouts Are Cool. Be Prepared

How long will you be riding? How badly could the weather deteriorate? Will you be standing around later in cold, wet gear? Pumps, spares, a change of clothes can make a world of difference to your ride, and make you a hero to those who didn't put the thought in beforehand. Splitting the responsibilities on longer epics makes sense. ie: one rider brings a chain break, another brings a spare derailleur, etc. Everybody should bring spare tubes though!

Consider Weight to Strength

The trend in the past has been towards ultra-light frames & parts. When hardcore riding tests the limits of rider and machine, durability & bombproof strength become just as important. The market has become more sensible to strength and less obsessed by purely weight. Don't sacrifice reliability and safety with parts and accessories that can't take the abuse you'll want to dish out.

The Right Bike From the Right Dealer

Select a reputable dealer that will be able to fill your needs. Your bicycle retailer should assist you to find the right bike, the correct fit and explain the operation of your new purchase. Check out the way they treat other customers, especially newbies. Ask about after-purchase tune-ups and maintenance. Avoid stores that deliver attitude instead of service.

What's Your Favourite Position?

The mass of your upper body has a significant influence on how your bike rolls over terrain. When climbing steep, spread your weight over both wheels and move it fore and aft depending on traction. Usually you will have your rear forward on the saddle, driving your weight into the rear tire. Keep your elbows bent and chest low.

Beginners will inch over the side of a drop-off with their weight way off the back of the saddle. This is fine if the runout is gradual, but if it's more abrupt you need more aggressive body english. Get centered over the bike. As you go over you will be heavy on the hands and light on the feet. As you transition at the bottom pull up on the bars and be heavy on the feet. As you progress, you will just wheelie over the edge, landing rear wheel first. Practice on small drops first, because you can't afford to mess up a big one!
