

Team Saracen '99 BMX

IN YOUR FACE QUALITY & CHOICE

X34 RACE

The X34 is a classic hard-as-nails no frills BMX with a down to earth pricetag. The frame boasts Saracen's fat 50mm down tube and a Race Series fork. Braking is via Tektro 'V's and the one piece crankset is the same CD200 as on the XF52. Even the spec' detail of the finishing kit is way beyond what you'd usually expect to see at this price.

X34 £199.99

XS64 FULL SUSPENSION

Play bike? Jump bike? Dirt bike? Cruiser? Whatever you want to call it, the XS64 is a plush fun filled machine with a go-anywhere personality. A bunch of sturdy components complement the dual suspension approach to comfort and damage limitation. Sometimes, you just have to invent a whole new breed of bike. Suck it and see.

XS64 £299.99

XF36

FREESTYLE

The XF36 is a ready to roll Freestyle street bike, complete with alloy pegs and an Odyssey Gyro 2 Rotor. Chromoly main tubes, 48 spoke alu rims and the gripped 'n sorted brakes flatter a selection of Freestyle specific finishing parts that, for this price, make it a sure fire winner. The ideal entry bike to a world of fun.

£199.99

XF52

FREESTYLE

When the chips are down, no one appreciates compromise. The XF52 goes a couple of steps beyond the XF36, but without breaking the bank. A few years back, you'd have been looking at this sort of money for a frame on its own. Now you can score a whole bike with the same capabilities. The frame and forks are 100% chromoly, the down tube is a beefy 50mm, the Odyssey XL Rotor performs gyro duties, rims are alu DM24s and the Dia Compe V brake up front flatters the U at the rear.
